Mr. Chagoyan
mchagoyan@chusd.org
Coalinga High School

In order to enhance the educational experience at Coalinga High School, our CTE/ROP program has purchased web hosting for our advanced technology class, Web Page Design 2. This year, due to distance learning, we will be utilizing our purchased web hosting for Web Page Design 1. This gives your child an opportunity to publish and share work on the World Wide Web. Web publication offers your child a unique learning opportunity and has the following benefits:

- Learning real-life skills using FTP to post to a web server
- Presenting technologies learned to a global audience
- Receiving feedback from peers and family
- Monitoring web content and assignments by parents or legal guardians
- Practicing communication skills via writing, artwork, photos, audio, and video

Your child's work will be published at:

http://chsserver01.org

PRIVACY

In order to protect your child's privacy, access to the class Web directory is password protected. In addition, teacher and parents have access to student websites to monitor for adherence to the recommended privacy guidelines:

- No personal information about your child, such as address or telephone # should be published

Please complete the section below and return as soon as possible.

I give permission to publish my child's web assignments on the Web. I understand I must monitor for adherence to the recommended privacy guidelines in order to protect my child's privacy.
